DESIGN UNDER PRESSURE

Molly Wilson

Senior Designer and Researcher, Simply Secure
Berlin, DE

World Interaction Design Day // 29 September 2020

#designunderpressure

ABOUT SIMPLY SECURE

Simply Secure (<http://simplysecure.org>) is a design nonprofit based in Berlin and NYC, founded in 2014.

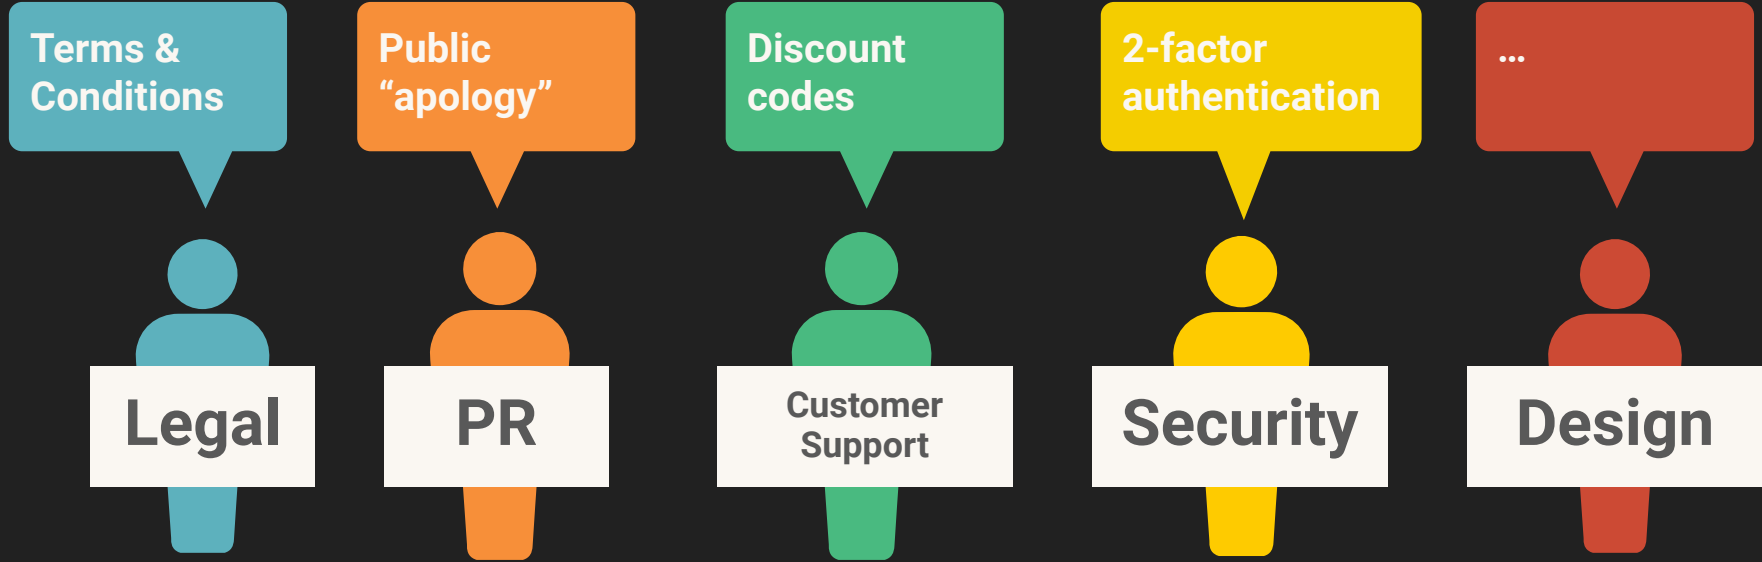

We design and support responsible technology that enables human dignity.

We offer design and strategy support for:

- > Open technology tools
- > Privacy, security, decentralization, transparency, human rights tools
- > Nonprofits working in and around technology

3 KEY CONCEPTS

- 1. Stress cases**
- 2. Threat modeling**
- 3. Persona non grata**

1. Stress cases

When extreme conditions lead to unintended situations

ZOOM

**“Let’s make
videoconferencing quick and
easy.”**

- > 4 April 2020:
Charlevoix, Michigan
(population 2513)
city council meeting
interrupted with
pornography and
racial epithets

ZOOM CONT.

- > Features to prevent zoombombing do exist, but...
 - >> They're not on by default
 - >> They're hard to find
 - >> They need explanation
- > Is every city council member supposed to know this?

FACEBOOK

“Let’s help people collect and share meaningful moments in their lives.”

- > In 2016, Eric Meyer’s daughter Rebecca died of a brain tumor at age 6
- > Facebook showed him “memories” of her with happy graphics

AIRBNB

"Let's make it easy for people to post tourist accommodations online."

- > Over 20,000 Airbnbs in Barcelona (2017)
- > 20 million people/year come to Barcelona, a city of 1.6 million
- > Rising rents, unlivable neighborhoods, residents' quality of life declining

Images: Business Destinations, Geographical Magazine

EXTREME CONDITIONS

- > Growth
- > Adoption
- > Publicity
- > Urgency
- > Demand
- > Disaster
- > Tragedy
- > Psychological stress
- > Unintended use cases
- > ...

Image: Amber Kipp

2. Threat modeling

Identifying and addressing potential harm to a person

What is this man doing?

Study the person

Study the context

What might go wrong?

People also ask

How do I secure my home computer?

How can I secure my laptop?

How do I secure my computer from unauthorized access?

How can I secure my operating system?

Feedback

ASK ABOUT THREATS

- > ~~What could hurt you?~~ *Too invasive and scary!*
- > Is there anything that would help you feel safer?
More confident?
- > What sorts of things do you do to help yourself stay safe [in this context]?
- > What advice do you give others to stay safe [in this context]?
- > Is there anything here that looks like it might break easily?

A photograph of a baby with short brown hair, wearing a yellow long-sleeved shirt and yellow pants, standing inside a wooden toy chest. The baby is facing away from the camera, looking into the chest. The chest is filled with various items: a stack of colorful children's books on the top shelf, a blue book on the right side, and a purple ball and other toys in a drawer at the bottom. The chest has yellow-painted interior shelves and drawers. The background shows a light-colored wall and a wooden floor.

Threat modeling is an ongoing process

3. **Persona non grata***

A user you don't want

* After Cennydd Bowles, *Future Ethics*

This is the “unwanted person” you probably have in mind

PERSONAS NON GRATA

Stalker

Terrorist

Surveillance

Truther

Abuser

Swarm

Prankster

Fraudster

Naïf

Opportunist

THE NAÏF

Doesn't know the unwritten rules of how to behave in a certain context, and as a result ends up hurting themselves or others.

// A baby or pet locks someone out of their account permanently

// A kid buys \$5000 of IAPs

// A excited new homeowner posts pictures of the keys to their house, as well as the address, on social media

THE OPPORTUNIST

Finds loopholes and workarounds within your business model, allowing them to make or save money in a way you don't want.

// Someone stockpiles medical supplies and sells them for a markup on your marketplace

// Someone uses your platform to post huge files for download

// Someone makes multiple accounts to trade discount codes

THE TRUTHER

Denies social, scientific, or legal consensus, playing on emotions and the multiplying power of virality to tell “the real story.”

// Posting that COVID-19 is a hoax, Kamala Harris isn't eligible to run for US vice president, climate change is not caused by humans, Black Lives Matter protests are violent... you know what, let's stop there

THE PRANKSTER

Disrupts or causes chaos for the sake of notoriety, money, pleasure, or power.

- // Causing seizures with blinking images
- // Abusing homeless people on video
- // Inserting unlabeled, unwanted pornographic or violent images
- // Making people think something bad has happened (house robbed, computer hacked, child died) when it hasn't

WHY NO "RACIST"?

A MORE DETAILED TOOL

THE
FORGOTTEN

THE
SERVICE DOG

THE
SIREN

THE
SIREN

What would using
your product "too much"
look like?

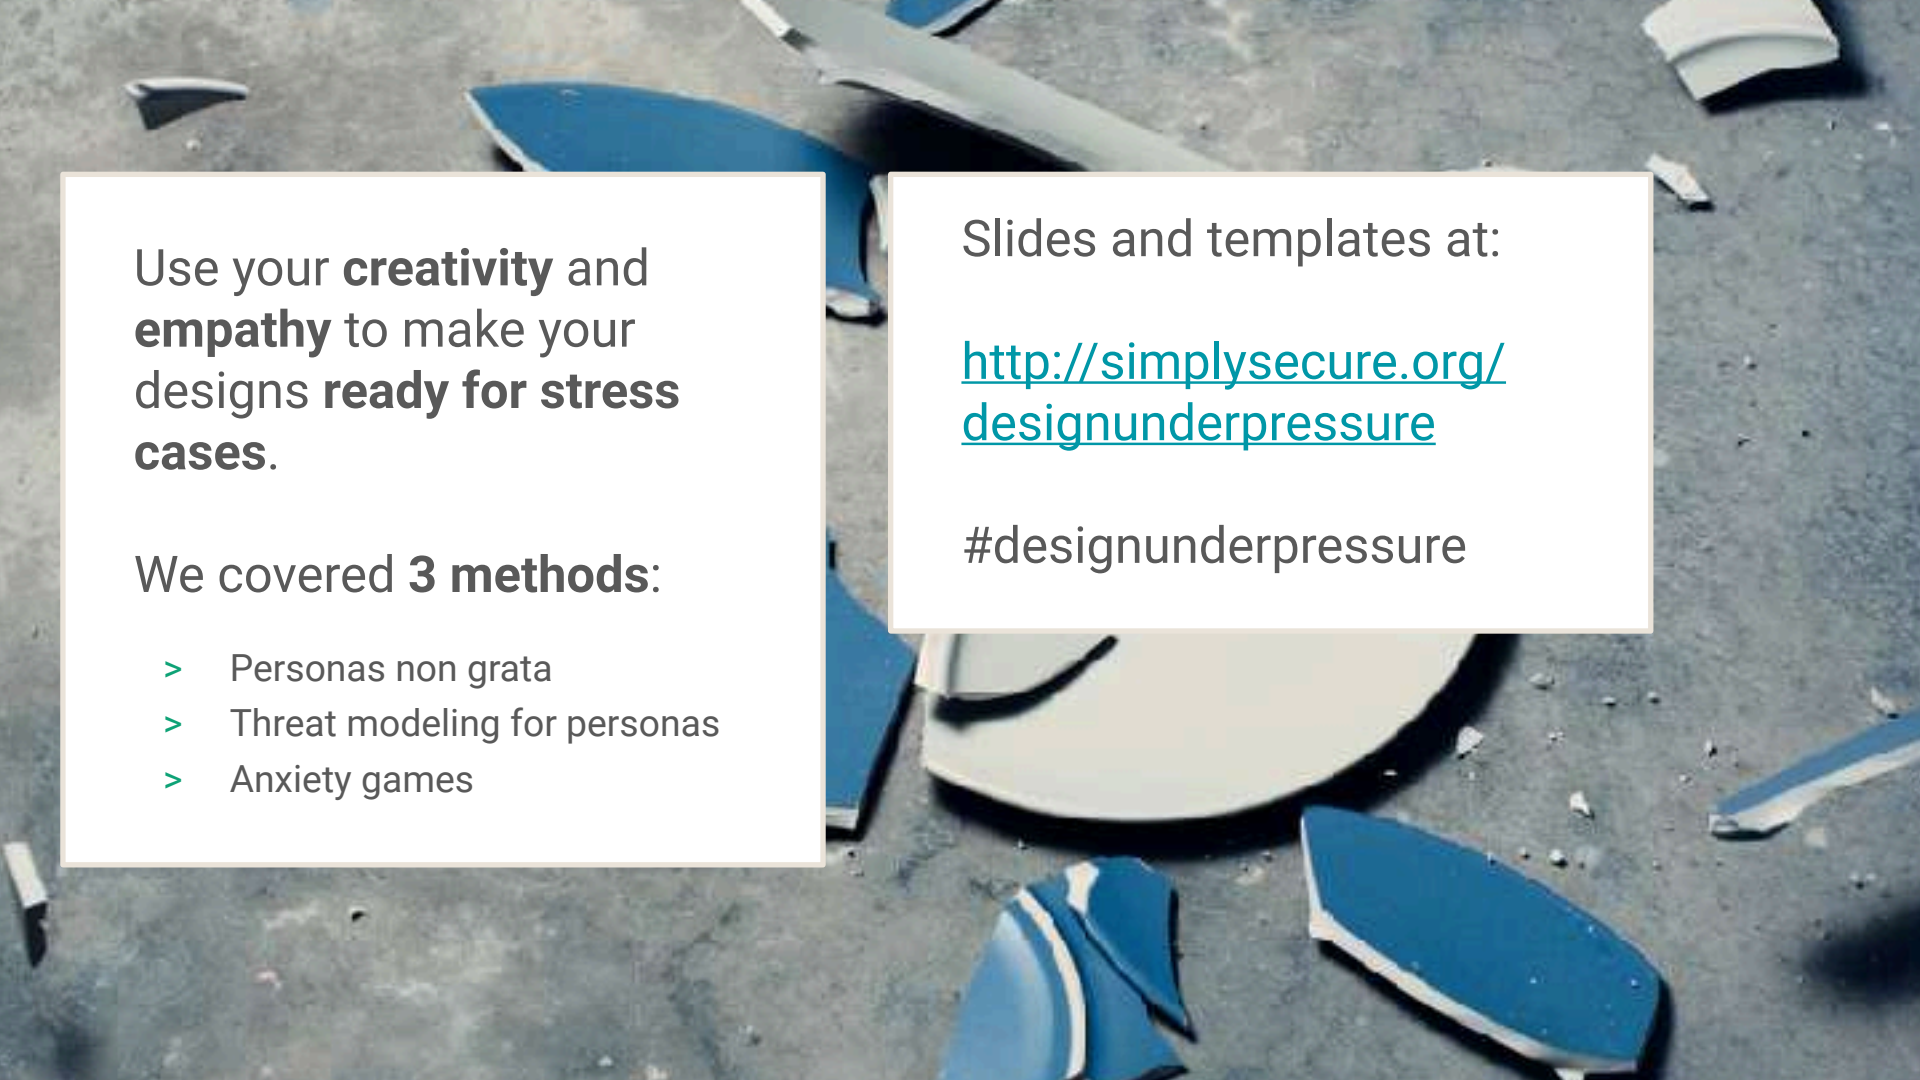

How does your product encourage
users to engage, and how does it
make it easy to disengage?

How does your product respect
people's boundaries and the other
parts of their lives?

In what situations might it be
inappropriate or distracting to
use your product?

tarotcardsoftech.artefactgroup.com

Use your **creativity** and **empathy** to make your designs **ready for stress cases**.

We covered **3 methods**:

- > Personas non grata
- > Threat modeling for personas
- > Anxiety games
